

MULTIPATCHER (UK) LTD.

Pedestrian/Operative protection isn't an option, it's a must

BAAVA 156VL Hostile Mitigation Barrier

The BAAVA 156VL offers the shortest stopping distance in the world, in its category, in certification crash tests, with 5.5 metres at 48 km/h (BSI-PAS68).

Perfect for protecting your workforce in limited workspaces such as those conducted for Utilities and Local Authorities.

Excellent for securing pedestrian areas for events such as parades, seasonal/regular markets, sports and entertainment zones.

System is totally modular.

One person can set up a lane width closure in 5 minutes with just a hand tool.

Removable lever handle means one person can open full lane width barrier in seconds.

www.multipatcher.co.uk

Storage and transportation come easily too. Each module has a racking system so they can be individually dropped across a network and built on site, maximising the payload of delivery.
